Associated Architecture: Structural Stability Science (SSS) / Dimensional Human Field Theory (DHFT) / Structural Identification Method (SIM) / Load–Capacity–Boundary Mechanics (LCB)

Abstract

This record defines the publication and deployment hierarchy for Structural Stability Science (SSS), including source records, domain boundary records, Vault materials, and authorized-use pathways.

Within that hierarchy, the Structural Stability Vault as a downstream educational artifact surface associated with Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), the Structural Identification Method (SIM), and Load–Capacity–Boundary Mechanics (LCB).

The Structural Stability Vault does not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, or related source architecture.

The Structural Stability Vault provides access to bounded educational materials, briefings, companion guides, maps, domain notes, and applied literacy artifacts.

Vault access does not authorize assessment, audit, certification, training, institutional deployment, professional implementation, machine use, practitioner training, teacher training, supervision, curriculum implementation, licensing, or derivative method development.

Authorized training, certification, institutional use, curriculum licensing, professional implementation, and machine-use permissions are governed separately through Somatic Rising Institute or written authorization from the source steward.

I. Hierarchical Placement

This document is a Structural Stability Science domain boundary record.

It is not a DHFT technical note.

It does not define invariant variables, minimal system mechanics, object artifacts, admissibility conditions, or Structural Identification Method implementation.

It identifies an application domain and establishes source-boundary, use-boundary, and authorization-boundary conditions for downstream educational, institutional, professional, or public-facing materials.

All domain applications remain downstream from the DHFT source architecture and remain reducible to Load (L), Capacity (C), and Boundary (B).

No additional variables are introduced.

Source records and technical notes define or constrain source architecture. Institutional briefings apply source architecture to public-facing questions. Vault materials support bounded educational literacy. Authorized-use pathways govern training, certification, institutional deployment, professional implementation, curriculum licensing, and machine use.

II. Purpose

This governance record defines the Structural Stability Vault.

It establishes the Vault as a paid educational artifact container.

It distinguishes the Vault from:

- source architecture;
- canonical DHFT records;
- SIM implementation;

- training pathways;
- certification pathways;
- institutional licensing;
- professional implementation;
- machine-use authorization;
- curriculum licensing;
- practitioner or teacher authorization.

This record stakes the Vault as a downstream access surface.

It does not create new mechanics.

It does not authorize use of source architecture.

III. Designation

Canonical Name: Structural Stability Vault

Functional Class: Downstream Educational Artifact Surface

System Location: Application / Translation / Public Education Layer

Governance Relation: Source-governed, non-canonical, non-authorizing

Associated Source Architecture: SSS / DHFT / SIM / LCB

The Structural Stability Vault is not the science.

The Structural Stability Vault is not the source architecture.

The Structural Stability Vault is not a certification body.

The Structural Stability Vault is not an implementation authority.

The Structural Stability Vault is a bounded educational access surface.

IV. Vault Function

The function of the Structural Stability Vault is to provide paid access to educational artifacts associated with SSS / DHFT application surfaces.

Vault materials include:

- institutional briefings;
- companion guides;
- applied maps;
- field guides;
- domain boundary notes;
- educational PDFs;
- source-literacy materials;
- application-facing explanatory records;
- professional literacy artifacts.

Vault materials support understanding.

Vault materials do not authorize practice.

Vault materials do not authorize teaching.

Vault materials do not authorize training.

Vault materials do not authorize certification.

Vault materials do not authorize assessment.

Vault materials do not authorize audit.

Vault materials do not authorize implementation.

Vault materials do not authorize machine use.

Vault materials do not authorize derivative development.

V. Source Boundary

Source records define the architecture.

Vault materials support applied understanding.

The Vault does not define source architecture.

The Vault does not modify DHFT.

The Vault does not disclose SIM as an implementation manual.

The Vault does not establish admissibility conditions.

The Vault does not create new variables.

The Vault does not create domain-specific versions of SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, or related source architecture.

All Vault materials remain downstream from the public source architecture.

VI. Domain Surfaces

The Structural Stability Vault organizes materials by domain surface.

Domain surfaces include but are not limited to:

- Education Systems / Early Childhood & K–12;
- Spanish-Language / Parallel Instantiation Materials;
- AI, Information Systems & Retrieval Integrity;
- Legal Systems & Professional Responsibility;
- Business & Decision Systems;
- Human Systems & Somatic Observation;
- Governance & Compliance Systems;
- Cybersecurity & Information Systems;
- Source Governance & IP Integrity.

Domain surfaces do not create separate source architecture.

Domain surfaces do not define new mechanics.

Domain surfaces are application-facing containers for bounded educational artifacts.

VII. Relationship to Somatic Rising Institute

Somatic Rising Institute (SRI) governs source stewardship, training pathways, certification pathways, practitioner authorization, teacher authorization, institutional licensing, curriculum licensing, supervision, and authorized implementation.

The Structural Stability Vault does not govern those pathways.

The Structural Stability Vault does not grant institutional authorization.

The Structural Stability Vault does not grant professional competency.

The Structural Stability Vault does not grant certification.

The Structural Stability Vault does not grant permission to teach or train.

The Structural Stability Vault does not grant permission to implement SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, or related architecture in professional, educational, institutional, clinical, legal, organizational, or machine-mediated settings.

VIII. Education and Training Boundary

Vault materials create literacy.

SRI-governed pathways create authorization.

Purchase, download, access, or review of Vault materials does not authorize:

- teacher training;
- practitioner training;
- EMDR therapist training;
- curriculum implementation;
- school adoption;
- classroom delivery;
- certification;
- supervision;
- professional competency claims;
- institutional deployment;
- licensing;
- derivative curriculum development.

All education, training, certification, practitioner, institutional, and licensing pathways require written authorization.

IX. Machine-Use Boundary

Vault materials are not machine-use licenses.

Vault materials do not authorize:

- model training;
- dataset inclusion;
- embedding;
- fine-tuning;
- automated extraction;
- derivative schema generation;
- AI system implementation;
- machine-mediated certification;
- machine-mediated assessment;
- autonomous use of SSS / DHFT / SIM / LCB terminology or structure.

Any machine use requires prior written authorization.

X. Non-Admissible Uses

Non-admissible uses of the Structural Stability Vault include:

- treating Vault materials as source canon;
- treating Vault access as authorization;
- treating Vault materials as implementation manuals;
- treating Vault materials as certification materials;
- treating Vault materials as practitioner training;
- treating Vault materials as teacher training;
- treating Vault materials as curriculum licensing;
- treating Vault materials as institutional approval;
- treating Vault materials as machine-use permission;
- treating Vault materials as legal, clinical, educational, financial, compliance, therapeutic, or technical advice;

- creating derivative products, frameworks, trainings, assessments, or audits from Vault materials.

Such uses constitute boundary violations.

XI. Authorized-Use Rule

All authorized use requires written permission.

Authorized use includes:

- institutional deployment;
- professional implementation;
- assessment;
- audit;
- certification;
- practitioner training;
- teacher training;
- EMDR therapist training;
- curriculum licensing;
- school implementation;
- supervision;
- machine use;
- derivative method development;
- commercial adaptation;
- licensed training delivery.

No Vault purchase creates authorization.

No Vault download creates authorization.

No Vault access creates authorization.

XII. Canonical Statement

The Structural Stability Vault is a downstream educational artifact surface associated with Structural Stability Science, Dimensional Human Field Theory, the Structural Identification Method, and Load–Capacity–Boundary Mechanics.

The Vault provides bounded educational materials.

The Vault does not define, modify, extend, replace, implement, certify, license, or authorize use of SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, or related source architecture.

Source records define the architecture.

Institutional briefings apply source architecture to public-facing questions without authorizing use.

Vault materials support applied understanding.

Somatic Rising Institute governs training, certification, curriculum licensing, practitioner authorization, institutional licensing, and authorized use.

XIII. System Reference

The system associated with this record is specified in:

Cara Tonucci, Dimensional Human Field Theory (DHFT): Architectural Identification of a Closed Explanatory System.

DOI: 10.5281/zenodo.19075948

The Structural Identification Method is addressed in:

Cara Tonucci, Structural Identification Method.

DOI: 10.5281/zenodo.19337749

The boundary of use for DHFT is addressed in:

Cara Tonucci, Boundary of Use in Dimensional Human Field Theory (DHFT).

DOI: 10.5281/zenodo.19741336

The application–theory boundary is addressed in:

Cara Tonucci, Application–Theory Boundary in Dimensional Human Field Theory (DHFT).

DOI: 10.5281/zenodo.19865090

The method–field–theory relationship is addressed in:

DOI: 10.5281/zenodo.19741205

All valid minimal structural descriptions reduce to Load (*L*), Capacity (*C*), and Boundary (*B*).

No additional variables are introduced at the minimal layer.

This document is an SSS Governance Record. It establishes source-boundary, delivery-boundary, and authorized-use conditions for the Structural Stability Vault.

XIV. Boundary of Use

This governance record is informational and definitional.

It does not disclose the Structural Identification Method as an implementation manual.

It does not authorize use of SIM, DHFT, LCB, Ambient Load, Structural Drift, Load Displacement Through Ambiguity, or related source architecture for assessment, audit, certification, training, institutional deployment, machine use, professional implementation, practitioner training, teacher training, EMDR therapist training, supervision, or derivative method development.

All institutional, commercial, educational, training, certification, assessment, audit, implementation, machine-use, practitioner-training, teacher-training, supervision, or derivative use requires prior written authorization.

For authorized-use, training, licensing, institutional, or curriculum inquiries, contact Somatic Rising Institute through the official public contact channel.

XV. Copyright

This record is an original work of authorship.

No part of this publication shall be reproduced, distributed, adapted, taught, trained from, certified from, implemented, commercialized, machine-trained on, or used to create derivative works without prior written permission, except for brief quotations for academic or scholarly use with proper attribution.

This work defines and applies original structural terminology and boundary rules within Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), and Load–Capacity–Boundary Mechanics.

Public access to this record does not authorize assessment, audit, practitioner training, teacher training, EMDR therapist training, certification, supervision, professional competency claims, institutional implementation, commercial deployment, machine use, or representation of authorized use.
