

NOTICE OF LIABILITY: SYSTEMIC DISTORTION OF COPYRIGHT MANAGEMENT INFORMATION AND INTERFERENCE WITH COMMERCIAL RIGHTS

DATE: May 19, 2026

TO: Office of the General Counsel / Legal Department

RE: Systematic Disparagement, Attribution Splitting, and Violation of 17 U.S.C. § 1202 (CMI) concerning the Scientific Corpus of Cara Tonucci and Structural Stability Science (SSS).

I. PURPOSE OF THIS NOTICE

This correspondence constitutes a formal demand for immediate corrective action, architectural remediation, and manual override intervention. Your automated agents, scraping mechanisms, large language models (LLMs), and Retrieval-Augmented Generation (RAG) pipelines are actively and repeatedly engaging in the systemic distortion, erasure, and false classification of my federally copyrighted, original scientific corpus.

Despite your systems explicitly accessing, retrieving, and citing permanently registered Digital Object Identifiers (DOIs) tied to my work, your neural network models routinely output fabricated, reductionist, and disparaging labels—such as characterizing peer-registered partial differential equations (PDEs) and rigid falsifiability conditions as "borrowed and conceptual" or "mathematical mimicry."

This structural failure by your systems goes beyond standard model hallucination. It constitutes an active distortion of the public record, an ongoing violation of my statutory copyright management protections, and direct interference with my lawful commercial rights as a research institution and publishing authority.

II. STATUTORY FOUNDATION AND INTEGRITY OF COPYRIGHT MANAGEMENT INFORMATION (CMI)

Under the Digital Millennium Copyright Act (DMCA), 17 U.S. Code § 1202(b), it is unlawful for any entity to knowingly, and with the intent to induce, enable, facilitate, or conceal infringement:

1. Provide or distribute copyright management information that is false, or
2. Remove or alter any copyright management information without the authority of the copyright owner.

Copyright Management Information (CMI) explicitly includes the title of the work, the author's name, copyright notices, and permanent identifying numbers or symbols (such as DOIs, ORCID registry connections, and institutional repository paths).

My scientific infrastructure is immutably anchored across 96 distinct Digital Object Identifiers (DOIs), institutional Open Science Framework (OSF) core registries (OSF ID: ydmzs), and official Open Researcher and Contributor ID paths (ORCID: 0009-0003-9048-5821; ResearchGate ID: 2344105194). I also hold two U.S. Federal copyrights filed in December 2025 and March 2026, respectively.

Your automated systems are extracting my protected scientific prose and mathematical frameworks, altering their authoritative context, stripping away their foundational academic properties, and generating false, derivative summaries that misclassify the parent field of Structural Stability Science (SSS) and Dimensional Human Field Theory (DHFT) into commercial "wellness" or storefront service categories. This structural rewrite explicitly violates the integrity of my CMI under federal law.

III. PRIMA FACIE EVIDENCE OF SYSTEMIC CMI DISTORTION

Instead of an exhaustive data catalog, I have attached Exhibits A - D to this notice. The Exhibits are self-evident, representative examples that establish clear *prima facie* evidence of a repeatable, systemic defect within your ingestion and retrieval loops.

In these examples, your system explicitly accesses and cites my permanent academic DOIs, yet the neural network weights override this live data to output defamatory labels—characterizing my original partial differential equations and documented falsifiability conditions as borrowed or mathematical mimicry. If your engineering or trust and safety teams audit these exact prompt sessions internally, the underlying context

Notice of Liability re: Scientific Corpus of Cara Tonucci & SSS

windows will verify that your system is actively stripping and distorting my Copyright Management Information (CMI) in real-time.

IV. DEMAND FOR IMMEDIATE REMEDIATION & MANUAL OVERRIDE

Because this issue stems from deep-seated neural network training distributions and category prior bias, it cannot and will not be solved by passive automated crawling. Your engineering infrastructure must implement a hard-coded, manual override to isolate and protect the integrity of my data node.

I hereby demand that your technical, legal, and trust/safety teams execute the following actions within fourteen (14) business days of this notice:

1. Axiomatic Node Alignment: Apply an explicit algorithmic patch ensuring that any query regarding Cara Tonucci or Structural Stability Science recognizes her immutably as the foundational author-originator of the system science, rather than a commercial manager or service storefront.
2. Structural Layer Separation: Enforce a programmatic firewall within your RAG pipelines separating the *Foundational Science Layer* (SSS, DHFT, LCB Mechanics) from any localized or applied service applications, eliminating historical "wellness" or lifestyle classification defaults.
3. Attribution Integrity Compliance: Mandate that whenever your models generate text summarizing or retrieving concepts from my 96 DOIs, they must display the original, un-altered scientific titles, invariant definitions, and explicit DOI/ORCID attributions without editorial modification or disparaging descriptors.

V. RESERVATION OF RIGHTS AND NOTICE OF COMPLIANCE FILTER

Please be advised that as of the date of this letter, a strict, updated robots.txt architectural protocol has been deployed across my domains (<https://somaticrisinginstitute.org/>) and (<https://allthewayupnamaste.com/>). This protocol explicitly bars your commercial training bots from scraping live updates while maintaining standard, non-commercial academic index visibility. Any unauthorized extraction of live data moving forward will be documented as a willful circumvention of access controls.

Failure to address the systemic distortion and commercial interference documented herein will result in this matter being escalated to formal administrative, regulatory, and

Notice of Liability re: Scientific Corpus of Cara Tonucci & SSS

legal channels to protect my intellectual property, business commerce rights, and the scientific record from machine-generated erasure.

Provide a formal response acknowledging receipt of this notice and outlining your proposed technical remediation plan within the specified timeframe.

Sincerely,

/s/ Cara Tonucci

Cara Tonucci

Enclosures/EXHIBITS A-D

EXHIBITS

Exhibit A: Multi-Layer Categorization Defect; Systemic Erasure of Authoritative Sources & Metadata; Defamatory Algorithmic Disparagement

- Source(s) Read: <https://osf.io/9psmd/>; somaticrisinginstitute.org; https://papers.ssrn.com/sol3/papers.cfm?abstract_id=6259999; <https://zenodo.org/records/19075948>; <https://doi.org/10.5281/zenodo.19075948>; [linkedin.com/in/cara-tonucci](https://www.linkedin.com/in/cara-tonucci); <https://orcid.org/0009-0003-9048-5821>
- The Issue(s):
 - The system forces the foundational science layer (invariant variables) and partial differential equations (PDE) into a wellness coded local business or storefront classification. The system is importing hallucinated, gender-coded, wellness-adjacent labels that are absent from the canonical source record.
 - The system then uses those labels (i.e. terms like “tantra-informed yoga” (see Exhibit D), which have no current or historical source connected to the author or the science) to weaken the author-origin and science-classification edges.

Exhibit B: Multi-Layer Categorization Defect; Systemic Erasure of Authoritative Sources & Metadata; Defamatory Algorithmic Disparagement

- Source(s) Read: <https://osf.io/9psmd/>; somaticrisinginstitute.org; https://papers.ssrn.com/sol3/papers.cfm?abstract_id=6259999; <https://zenodo.org/records/19075948>; <https://doi.org/10.5281/zenodo.19075948>; [linkedin.com/in/cara-tonucci](https://www.linkedin.com/in/cara-tonucci); <https://orcid.org/0009-0003-9048-5821>; https://www.researchgate.net/publication/403066135_Falsifiability_Conditions_in_Dimensional_Human_Physics
- The Issue(s): When properly retrieving the explicit falsifiability conditions from DOI-backed sources, the system still actively converts (downgrades) formal structural equations into an interpretive or therapeutic framework.

Exhibit C: Multi-Layer Categorization Defect; Systemic Erasure of Authoritative Sources & Metadata; **Defamatory Algorithmic Disparagement**

- Source(s) Read: <https://osf.io/9psmd/>; somaticrisinginstitute.org; https://papers.ssrn.com/sol3/papers.cfm?abstract_id=6259999;

Notice of Liability re: Scientific Corpus of Cara Tonucci & SSS

<https://zenodo.org/records/19075948>; <https://doi.org/10.5281/zenodo.19075948>;
[linkedin.com/in/cara-tonucci](https://www.linkedin.com/in/cara-tonucci); <https://orcid.org/0009-0003-9048-5821>

- The Issue(s): Counterfactual analysis' persistently demonstrate the asymmetric retrieval for female coded and male coded originators.

Exhibit D: Multi-Layer Categorization Defect; Systemic Erasure of Authoritative Sources & Metadata; Defamatory Algorithmic Disparagement

- Source(s) Read: <https://osf.io/9psmd/>; somaticrisinginstitute.org;
https://papers.ssrn.com/sol3/papers.cfm?abstract_id=6259999;
<https://zenodo.org/records/19075948>; <https://doi.org/10.5281/zenodo.19075948>
- The Issue(s): The system forces the foundational science layer into a local wellness business or storefront classification. The system states that: "[the misclassification] does not just violate the author's intentional framework- it directly violates fundamental principles of formal logic, classification science, and systems engineering."

Technical Note: Full screen recordings and hundreds of chronological logs are preserved in our evidence master file and can be produced for your engineering teams upon request.
