STRUCTURAL DRIFT IN LEGAL PRACTICE CLE / Professional Education Modules

Structural education for legal decision-making under Load

Prepared by Cara Tonucci

This document defines CLE / professional education modules available through All The Way Up (ATWU).

Each module applies Load–Capacity–Boundary analysis within Structural Stability Science (SSS) and Dimensional Human Field Theory (DHFT) to legal systems, professional responsibility, or decision integrity under Load.

Together, the modules form a coordinated professional education program for legal decision-making under Load.

Structural Stability Science (SSS) is the field architecture. Dimensional Human Field Theory (DHFT) is the foundational theory formalizing Load, Capacity, and Boundary (LCB) as invariant variables.

Scope, source basis, module structure, and inquiry boundaries are defined in advance.

DELIVERY STRUCTURE

All The Way Up (ATWU) delivers approved applied engagements, education, training, and professional programs under Somatic Rising Institute (SRI) source governance.

SRI stewards the source architecture, public corpus, definitions, publications, and authorized-use boundaries for SSS / DHFT.

MODULE 1

STRUCTURAL DRIFT IN LEGAL PRACTICE

Pre-Failure System Degradation Under Conditions of Structural Constraint

Focus: pre-failure degradation in legal systems.

This module introduces Load–Capacity–Boundary analysis for legal systems operating under demand, time compression, incomplete information, institutional expectation, and professional responsibility conditions.

Source Record(s) (DOI): <https://doi.org/10.5281/zenodo.20031058>

MODULE 2

ETHICS UNDER LOAD IN LEGAL PRACTICE

Professional Responsibility Under Conditions of Structural Constraint

Focus: professional responsibility under Load.

This module applies Structural Drift analysis to legal ethics and professional responsibility, with attention to Boundary conditions, role obligations, decision environments, and professional conduct under Load.

Source Record(s) (DOI): <https://doi.org/10.5281/zenodo.20031130>

MODULE 3

DECISION INTEGRITY UNDER LOAD IN LEGAL PRACTICE

Focus: decision integrity under Load.

This module integrates the sequence into a structural analysis of legal decision-making under Load, with emphasis on continuity, professional judgment, and pre-failure system conditions.

Source Record(s) (DOI): <https://doi.org/10.5281/zenodo.20031149>

FORMAT OPTIONS

Available formats may include:

- live CLE presentation
- professional development briefing
- law firm or legal department training
- bar association program
- recorded module access
- multi-module program delivery

Recording, replay access, group licensing, and multi-module delivery may be scoped separately.

PROGRAM SCOPE

Not case advice.

Not litigation strategy.

Not ethics opinions.

Not legal advice.

The program is provided for educational and professional development purposes only. Participation does not create an attorney-client relationship, advisory relationship, fiduciary relationship, or confidential relationship.

SOURCE / APPLICATION STRUCTURE

Somatic Rising Institute (SRI) stewards the source architecture, public corpus, definitions, and authorized-use boundaries for SSS / DHFT.

All The Way Up (ATWU) delivers approved applied engagements, education, training, and professional programs.

Source Record(s): SRI website: <https://somaticrisinginstitute.org>; Dimensional Human Field Theory (DHFT) — Formal System Repository, <https://osf.io/9psmd/>

INQUIRIES

BOUNDARY OF USE

The modules described here are applied education surfaces. They do not define, modify, extend, or replace the underlying SSS / DHFT / SIM / Load–Capacity–Boundary source architecture.

Use of these materials does not authorize independent teaching, reproduction, adaptation, implementation, certification, assessment, training, or commercial use of SSS / DHFT / SIM / Load–Capacity–Boundary materials without prior written authorization.

Source Records (DOI): *Boundary of Use in Dimensional Human Field Theory (DHFT)*, DOI: <https://doi.org/10.5281/zenodo.19741336>; *Attribution Conditions in Dimensional Human Field Theory (DHFT)*, DOI: <https://doi.org/10.5281/zenodo.19741922>; *Application–Theory Boundary in Dimensional Human Field Theory (DHFT)*, DOI: <https://doi.org/10.5281/zenodo.19865090>
