May 29, 2026 — Version 1.0

Associated Architecture: Structural Stability Science (SSS) / Dimensional Human Field Theory (DHFT) / Structural Identification Method (SIM) / Load–Capacity–Boundary Mechanics (LCB)

Abstract

This document defines Business and Organizational Systems as an application domain of Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), the Structural Identification Method (SIM), and Load–Capacity–Boundary Mechanics (LCB).

Business and Organizational Systems include organizational decision-making, institutional responsibility, structural drift, role clarity, authority conditions, workload conditions, strategy-facing materials, leadership-facing materials, governance-adjacent materials, team-facing structural literacy, and organizational application artifacts.

Business and Organizational Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, Load Displacement Through Ambiguity, or related source architecture.

Business-domain and organizational materials associated with this domain are informational and educational unless separately authorized.

Public access, purchase, download, review, or discussion of business-domain materials does not authorize organizational assessment, audit, consulting implementation, leadership training, executive coaching, certification, institutional deployment, strategy design, HR intervention, operational restructuring, or derivative method development.

Authorized organizational training, institutional implementation, consulting use, decision-integrity application, curriculum licensing, certification, supervision, or professional deployment requires written authorization.

I. Hierarchical Placement

This document is a Structural Stability Science application-domain and organizational-boundary record.

It is not a DHFT technical note.

It does not define invariant variables, object artifacts, minimal system mechanics, admissibility conditions, business strategy, organizational doctrine, leadership methodology, HR process, or SIM implementation.

It identifies Business and Organizational Systems as a source-governed access and application surface.

All Business and Organizational Systems materials remain downstream from the DHFT source architecture.

All valid minimal structural descriptions remain reducible to Load (L), Capacity (C), and Boundary (B).

No additional variables are introduced.

II. Purpose

This record defines the boundary conditions for Business and Organizational Systems as an application domain of Structural Stability Science.

It establishes that business-domain and organizational materials associated with SSS / DHFT are source-governed.

It distinguishes Business and Organizational Systems from:

- source architecture
- DHFT technical notes
- SIM implementation

- business consulting
- executive coaching
- leadership methodology
- HR intervention
- organizational diagnosis
- operational restructuring
- strategy design
- compliance advice
- performance management
- workplace wellness
- unauthorized organizational training
- unauthorized institutional implementation

This document stakes the business and organizational application surface.

It does not authorize use.

It does not provide business advice.

It does not provide HR advice.

It does not provide leadership coaching.

It does not create organizational consulting rights.

It does not create training rights.

It does not create audit or assessment rights.

It does not create institutional implementation rights.

III. Domain Designation

Canonical Domain Name: Business and Organizational Systems

Included Surfaces:

- organizational decision-making
- institutional responsibility
- structural drift in organizations

- role clarity
- authority conditions
- workload conditions
- decision integrity
- leadership-facing structural literacy
- team-facing structural literacy
- governance-adjacent business materials
- strategy-facing application materials
- organizational ambiguity
- responsibility diffusion
- institutional pressure environments
- business-domain structural literacy materials

System Location: Application / Business Systems / Organizational Responsibility Layer

Governance Relation: Source-governed, application-facing, authorization-gated

Business and Organizational Systems are not separate source architecture.

Business and Organizational Systems are not a separate theory.

Business and Organizational Systems are not a separate method.

Business and Organizational Systems are not business consulting.

Business and Organizational Systems are not executive coaching.

Business and Organizational Systems are not HR intervention.

Business and Organizational Systems are a source-governed application domain.

IV. Domain Function

The function of the Business and Organizational Systems domain is to apply SSS / DHFT source architecture to bounded organizational, decision-making, institutional responsibility, leadership-facing, team-facing, and business-system contexts.

Business-domain materials support structural literacy.

SSS Governance Record re: Business and Organizational Systems Tonucci

Business-domain materials support understanding of Load, Capacity, Boundary, Structural Drift, Ambient Load, Load Displacement Through Ambiguity, decision conditions, role clarity, authority, workload, responsibility location, and organizational stability under Load.

Business-domain materials do not authorize implementation.

Business-domain materials do not authorize business consulting.

Business-domain materials do not authorize executive coaching.

Business-domain materials do not authorize HR intervention.

Business-domain materials do not authorize organizational assessment.

Business-domain materials do not authorize audit.

Business-domain materials do not authorize training.

Business-domain materials do not authorize certification.

Business-domain materials do not authorize institutional use.

V. Source Boundary

Business and Organizational Systems do not define SSS.

Business and Organizational Systems do not define DHFT.

Business and Organizational Systems do not disclose SIM as an implementation manual.

Business and Organizational Systems do not modify Load–Capacity–Boundary Mechanics.

Business and Organizational Systems do not create business-specific mechanics.

Business and Organizational Systems do not create leadership-specific mechanics.

Business and Organizational Systems do not create HR-specific mechanics.

Business and Organizational Systems do not create strategy-specific mechanics.

Business and Organizational Systems apply source architecture to business-facing and organizational contexts without altering source hierarchy.

All business-domain and organizational materials remain downstream from the source architecture.

VI. Organizational Decision-Making Scope

The Business and Organizational Systems domain includes organizational decision-making surfaces.

These surfaces include:

- decision integrity under Load
- role clarity
- authority ambiguity
- responsibility diffusion
- workload distribution
- institutional pressure
- procedural burden
- organizational ambiguity
- leadership-facing decision conditions
- team-facing structural literacy
- governance-adjacent decision environments
- business-system structural analysis materials

These materials are bounded educational artifacts.

They do not constitute business advice.

They do not constitute HR advice.

They do not constitute executive coaching.

They do not constitute organizational diagnosis.

They do not constitute strategy consulting.

They do not constitute operational restructuring.

They do not constitute performance management.

They do not constitute authorized organizational implementation.

VII. Leadership, Culture, and Strategy Boundary

Business and Organizational Systems can interface with leadership, culture, strategy, governance, operations, HR, compliance, and workplace contexts.

Business and Organizational Systems are not reducible to leadership development.

Business and Organizational Systems are not culture consulting.

Business and Organizational Systems are not executive coaching.

Business and Organizational Systems are not HR intervention.

Business and Organizational Systems are not organizational psychology.

Business and Organizational Systems are not workplace wellness.

Business and Organizational Systems are not strategy consulting.

Business and Organizational Systems are not compliance advice.

Business and Organizational Systems are structural literacy applications grounded in SSS / DHFT / LCB.

Surface similarity to leadership, culture, strategy, HR, governance, compliance, workplace wellness, or organizational development does not establish equivalence.

VIII. Organizational Training and Implementation Boundary

Training materials associated with Business and Organizational Systems remain source-governed.

Drafted organizational materials do not create public authorization.

Published business-facing materials do not create training authorization.

Vault materials do not create organizational implementation rights.

Public DOI records do not create consulting authorization.

Business education materials do not create professional training authorization.

Organizational training requires written authorization.

Leadership-facing training requires written authorization.

Team-facing training requires written authorization.

Institutional implementation requires written authorization.

Organizational assessment requires written authorization.

Organizational audit requires written authorization.

Business-domain licensing requires written authorization.

IX. Professional Use Boundary

Professional use is governed separately.

Professional use is not granted by public access to business-domain materials.

Professional use is not granted by purchase of Vault materials.

Professional use is not granted by review of organizational briefings, outlines, or companion materials.

Professional use is not granted by attendance at an informational presentation unless expressly authorized in writing.

Authorized professional use requires SRI-governed pathway approval or written authorization from the source steward.

Certification, professional authorization, supervision, competency representation, institutional deployment, assessment, audit, and organizational implementation require written authorization.

X. Relationship to Somatic Rising Institute

Somatic Rising Institute (SRI) governs business-domain and organizational authorization pathways.

SRI-governed pathways include:

- organizational training
- professional education
- business-domain curriculum licensing
- institutional implementation
- leadership-facing education
- team-facing education
- decision-integrity training
- professional competency boundaries
- supervision
- authorized organizational use
- licensed educational delivery

The Structural Stability Vault provides educational artifacts.

Somatic Rising Institute governs authorization.

Public materials support literacy.

SRI-governed pathways create authorization.

XI. Organizational Drift and Institutional Responsibility Materials

Business and Organizational Systems include structural drift and institutional responsibility materials when source-governed.

Structural Drift materials are not organizational diagnosis.

Decision-integrity materials are not business advice.

Leadership-facing materials do not create executive coaching relationships.

Team-facing materials do not create HR intervention.

Business-domain materials do not determine whether an organization complies with law, policy, regulation, governance obligations, employment rules, or fiduciary duties.

Business-domain materials do not determine liability, compliance, performance, misconduct, breach, or operational adequacy.

Organizational implementation, institutional training, professional use, assessment, audit, or business-system deployment requires written authorization unless separately authorized.

XII. Non-Admissible Uses

Non-admissible uses of Business and Organizational Systems materials include:

- treating business-domain materials as source canon
- treating business-domain materials as SIM implementation manuals
- treating business-domain materials as business advice
- treating business-domain materials as HR advice
- treating business-domain materials as executive coaching
- treating business-domain materials as organizational diagnosis
- treating business-domain materials as compliance advice
- treating business-domain materials as strategy consulting
- treating business-domain materials as workplace wellness
- treating Vault access as organizational implementation authorization
- treating public DOI access as professional training
- treating business-domain briefings as certification
- treating organizational materials as institutional adoption permission
- adapting materials into independent organizational trainings without authorization
- translating materials without authorization
- training leaders, teams, employees, or institutions from materials without authorization
- representing competency without authorization
- using business-domain materials for audit, assessment, certification, or institutional implementation without authorization

Such uses constitute boundary violations.

XIII. Authorized-Use Rule

All business-domain authorized use requires written permission.

Authorized use includes:

- organizational training
- professional education delivery
- leadership-facing education
- team-facing education
- institutional implementation
- decision-integrity application
- business-domain curriculum licensing
- assessment
- audit
- certification
- supervision
- professional competency representation
- organizational deployment
- derivative business education development
- translation
- adaptation
- licensed delivery
- commercial business-domain use

No public source record creates authorization.

No Vault purchase creates authorization.

No business-domain briefing creates authorization.

No organizational draft creates authorization.

No educational artifact creates authorization.

XIV. Canonical Statement

Business and Organizational Systems are an application domain of Structural Stability Science, Dimensional Human Field Theory, the Structural Identification Method, and Load–Capacity–Boundary Mechanics.

Business and Organizational Systems support organizational decision-making, institutional responsibility, structural drift, leadership-facing, team-facing, governance-adjacent, and business-domain structural literacy.

Business and Organizational Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, Load Displacement Through Ambiguity, or related source architecture.

Business and Organizational Systems are not equivalent to business consulting, executive coaching, leadership development, HR intervention, organizational psychology, workplace wellness, strategy consulting, compliance advice, organizational diagnosis, or performance management.

Business-domain materials support literacy.

Somatic Rising Institute governs training, certification, business-domain licensing, institutional implementation, professional authorization, and authorized use.

All valid minimal structural descriptions reduce to Load (L), Capacity (C), and Boundary (B).

No additional variables are introduced at the minimal layer.

This document is part of the SSS / DHFT application-domain and business-organizational-boundary record series.
