Associated Architecture: Structural Stability Science (SSS) / Dimensional Human Field Theory (DHFT) / Structural Identification Method (SIM) / Load–Capacity–Boundary Mechanics (LCB)

Abstract

This document defines Education Systems as an application domain of Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), the Structural Identification Method (SIM), and Load–Capacity–Boundary Mechanics (LCB).

Education Systems include early childhood education, K–12 curriculum, classroom structural literacy, teacher-facing materials, curriculum companions, and education-facing application surfaces.

Education Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, or related source architecture.

Education materials associated with this domain are informational and educational unless separately authorized.

Public access, purchase, download, or review of education-domain materials does not authorize classroom implementation, teacher training, school adoption, curriculum licensing, certification, professional competency claims, institutional deployment, or derivative curriculum development.

Authorized teacher training, curriculum licensing, school implementation, certification, supervision, and institutional use are governed separately through Somatic Rising Institute or written authorization from the source steward.

I. Hierarchical Placement

This document is a Structural Stability Science application-domain and education-boundary record.

It is not a DHFT technical note.

It does not define invariant variables, object artifacts, minimal system mechanics, admissibility conditions, or SIM implementation.

It identifies Education Systems as a source-governed access and application surface.

All Education Systems materials remain downstream from the DHFT source architecture.

All valid minimal structural descriptions remain reducible to Load (*L*), Capacity (*C*), and Boundary (*B*).

No additional variables are introduced.

II. Purpose

This record defines the boundary conditions for Education Systems as an application domain of Structural Stability Science.

It establishes that education-domain materials associated with SSS / DHFT are source-governed.

It distinguishes Education Systems from:

- source architecture
- DHFT technical notes
- SIM implementation
- social-emotional learning
- therapy

- behavior management
- trauma treatment
- wellness education
- unauthorized curriculum
- unauthorized teacher training
- unauthorized institutional implementation

This document stakes the education application surface.

It does not authorize use.

It does not publish full curriculum.

It does not create teacher training rights.

It does not create school implementation rights.

It does not create curriculum licensing rights.

III. Domain Designation

Canonical Domain Name: Education Systems

Included Surfaces:

- early childhood education
- K–12 education
- classroom structural literacy
- teacher-facing structural literacy
- curriculum companion materials
- developmental education materials
- school-facing educational artifacts
- educator training pathways
- curriculum licensing pathways
- Spanish-language and parallel-language education materials where source-governed

System Location: Application / Education / Curriculum Layer

Governance Relation: Source-governed, application-facing, authorization-gated

Education Systems are not separate source architecture.

Education Systems are not a separate theory.

Education Systems are not a separate method.

Education Systems are not an interpretive adaptation.

Education Systems are a source-governed application domain.

IV. Domain Function

The function of the Education Systems domain is to apply SSS / DHFT source architecture to bounded educational materials for early childhood, K–12, teacher-facing, and school-facing contexts.

Education-domain materials support structural literacy.

Education-domain materials support age-appropriate understanding of Load, Capacity, Boundary, Structural Drift, Ambient Load, decision conditions, and source-aware system behavior.

Education-domain materials do not authorize implementation.

Education-domain materials do not authorize teaching.

Education-domain materials do not authorize training.

Education-domain materials do not authorize certification.

Education-domain materials do not authorize curriculum adoption.

Education-domain materials do not authorize institutional use.

V. Source Boundary

Education Systems do not define SSS.

Education Systems do not define DHFT.

Education Systems do not disclose SIM as an implementation manual.

Education Systems do not modify Load–Capacity–Boundary Mechanics.

Education Systems do not create child-specific mechanics.

Education Systems do not create school-specific mechanics.

Education Systems do not create teacher-specific mechanics.

Education Systems apply source architecture to education-facing contexts without altering source hierarchy.

All education-domain materials remain downstream from the source architecture.

VI. Early Childhood and K–12 Scope

The Education Systems domain includes early childhood and K–12 surfaces.

These surfaces include:

- structural literacy for children;
- age-appropriate Load, Capacity, and Boundary language;
- classroom-facing structural awareness materials;
- educator-facing companion guides;
- curriculum support materials;
- school-facing introductory materials;
- decision literacy materials;
- regulation literacy materials;
- source-aligned learning artifacts.

These materials are bounded educational artifacts.

They do not constitute therapy.

They do not constitute clinical intervention.

They do not constitute behavioral treatment.

They do not constitute social-emotional learning authorization.

They do not constitute classroom implementation authorization.

VII. Social-Emotional Learning Boundary

Education Systems can interface with social-emotional learning contexts.

Education Systems are not reducible to social-emotional learning.

Education Systems are not SEL.

Education Systems are not behavior management.

Education Systems are not therapy.

Education Systems are not trauma treatment.

Education Systems are not wellness education.

Education Systems are not psychological intervention.

Education Systems are not classroom discipline systems.

Education Systems are structural literacy applications grounded in SSS / DHFT / LCB.

Surface similarity to SEL does not establish equivalence.

VIII. Curriculum Boundary

Curriculum materials associated with Education Systems remain source-governed.

Drafted curriculum does not create public authorization.

Published companion materials do not create curriculum licensing.

Vault materials do not create school implementation rights.

Public DOI records do not create teaching authorization.

Curriculum delivery requires written authorization.

Curriculum adaptation requires written authorization.

Curriculum translation requires written authorization unless separately authorized.

Curriculum licensing requires written authorization.

School or institutional adoption requires written authorization.

IX. Teacher Training Boundary

Teacher training is governed separately.

Teacher training is not granted by public access to education-domain materials.

Teacher training is not granted by purchase of Vault materials.

Teacher training is not granted by review of curriculum companions.

Teacher training is not granted by attendance at an informational presentation unless expressly authorized in writing.

Authorized teacher training requires SRI-governed pathway approval or written authorization from the source steward.

Teacher certification, educator authorization, supervision, and competency representation require written authorization.

X. Relationship to Somatic Rising Institute

Somatic Rising Institute (SRI) governs education authorization pathways.

SRI-governed pathways include:

- teacher training;
- curriculum licensing;
- school implementation;
- institutional adoption;
- educator certification;
- professional competency boundaries;

- supervision;
- authorized classroom use;
- licensed curriculum delivery.

The Structural Stability Vault provides educational artifacts.

Somatic Rising Institute governs authorization.

Public materials support literacy.

SRI-governed pathways create authorization.

XI. Spanish-Language Education Materials

Education Systems include Spanish-language and parallel-language education surfaces when source-governed.

Spanish-language education materials are not informal translations.

Spanish-language education materials are not derivative interpretations.

Spanish-language education materials do not create separate source architecture.

Spanish-language education materials preserve source hierarchy, variable identity, dependency order, and authorized-use boundaries.

Spanish-language curriculum implementation, translation, adaptation, teaching, school use, or institutional deployment requires written authorization unless separately authorized.

XII. Non-Admissible Uses

Non-admissible uses of Education Systems materials include:

- treating education-domain materials as source canon;
- treating education-domain materials as SIM implementation manuals;
- treating education-domain materials as SEL programs;
- treating education-domain materials as therapy;

- treating education-domain materials as trauma treatment;
- treating education-domain materials as behavioral intervention;
- treating education-domain materials as clinical materials;
- treating Vault access as curriculum authorization;
- treating public DOI access as teacher training;
- treating companion guides as certification;
- treating curriculum drafts as school adoption permission;
- adapting materials into independent curriculum without authorization;
- translating materials without authorization;
- training teachers from materials without authorization;
- representing competency without authorization.

Such uses constitute boundary violations.

XIII. Authorized-Use Rule

All education-domain authorized use requires written permission.

Authorized use includes:

- classroom implementation;
- school implementation;
- curriculum adoption;
- curriculum licensing;
- teacher training;
- educator certification;
- supervision;
- professional competency representation;
- institutional deployment;
- derivative curriculum development;
- translation;
- adaptation;
- licensed delivery;
- commercial education use.

No public source record creates authorization.

No Vault purchase creates authorization.

No curriculum companion creates authorization.

No educational artifact creates authorization.

XIV. Canonical Statement

Education Systems are an application domain of Structural Stability Science, Dimensional Human Field Theory, the Structural Identification Method, and Load–Capacity–Boundary Mechanics.

Education Systems support early childhood, K–12, teacher-facing, curriculum-facing, and school-facing structural literacy.

Education Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, or related source architecture.

Education Systems are not equivalent to SEL, therapy, behavior management, trauma treatment, wellness education, or psychological intervention.

Education-domain materials support literacy.

Somatic Rising Institute governs training, certification, curriculum licensing, institutional implementation, and authorized use.

DOI: 10.5281/zenodo.19742456

All valid minimal structural descriptions reduce to Load (*L*), Capacity (*C*), and Boundary (*B*).

No additional variables are introduced at the minimal layer.

This document is part of the SSS / DHFT application-domain and education-boundary record series.

XVI. Copyright

This record is an original work of authorship.

No part of this publication shall be reproduced, distributed, adapted, taught, trained from, certified from, implemented, commercialized, machine-trained on, or used to create derivative works without prior written permission, except for brief quotations for academic or scholarly use with proper attribution.

This work defines and applies original structural terminology and boundary rules within Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), and Load–Capacity–Boundary Mechanics.

Public access to this record does not authorize assessment, audit, practitioner training, teacher training, EMDR therapist training, certification, supervision, professional competency claims, institutional implementation, commercial deployment, machine use, or representation of authorized use.
