Associated Architecture: Structural Stability Science (SSS) / Dimensional Human Field Theory (DHFT) / Structural Identification Method (SIM) / Load–Capacity–Boundary Mechanics (LCB)

Abstract

This document defines Human and Somatic Systems as an application domain of Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), the Structural Identification Method (SIM), and Load–Capacity–Boundary Mechanics (LCB).

Human and Somatic Systems include human-system observation surfaces, somatic detection surfaces, body-based signal environments, nervous-system-facing language, practitioner-facing materials, teacher-facing materials, structural literacy resources, and human-support application artifacts.

Human and Somatic Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, Load Displacement Through Ambiguity, or related source architecture.

Human and somatic materials associated with this domain are informational and educational unless separately authorized.

Public access, purchase, download, review, or discussion of human and somatic materials does not authorize clinical practice, therapy, diagnosis, treatment, trauma treatment, somatic therapy, coaching, practitioner training, teacher training, EMDR

therapist training, certification, supervision, institutional deployment, assessment, audit, implementation, or derivative method development.

Authorized practitioner training, teacher training, EMDR therapist training, certification, supervision, professional implementation, institutional use, curriculum licensing, or human-systems deployment requires written authorization.

I. Hierarchical Placement

This document is a Structural Stability Science application-domain and non-clinical boundary record.

It is not a DHFT technical note.

It does not define invariant variables, object artifacts, minimal system mechanics, admissibility conditions, clinical methods, therapeutic protocols, somatic interventions, or SIM implementation.

It identifies Human and Somatic Systems as a source-governed access and application surface.

All Human and Somatic Systems materials remain downstream from the DHFT source architecture.

All valid minimal structural descriptions remain reducible to Load (L), Capacity (C), and Boundary (B).

No additional variables are introduced.

II. Purpose

This record defines the boundary conditions for Human and Somatic Systems as an application domain of Structural Stability Science.

It establishes that human and somatic materials associated with SSS / DHFT are source-governed.

It distinguishes Human and Somatic Systems from:

- source architecture
- DHFT technical notes
- SIM implementation
- therapy
- somatic therapy
- trauma treatment
- clinical practice
- diagnosis
- treatment
- wellness coaching
- nervous system coaching
- psychological intervention
- medical advice
- EMDR therapy
- unauthorized practitioner training
- unauthorized teacher training
- unauthorized institutional implementation

This document stakes the human and somatic application surface.

It does not authorize use.

It does not provide clinical advice.

It does not provide therapeutic guidance.

It does not create practitioner training rights.

It does not create teacher training rights.

It does not create EMDR therapist training rights.

It does not create institutional implementation rights.

It does not create assessment or audit rights.

III. Domain Designation

Canonical Domain Name: Human and Somatic Systems

Included Surfaces:

- human-system observation surfaces
- somatic detection surfaces
- body-based signal environments
- nervous-system-facing language
- practitioner-facing materials
- teacher-facing materials
- human-support structural literacy
- non-clinical somatic education materials
- structural awareness materials
- human-system companion guides
- EMDR therapist-facing education surfaces where source-governed
- yoga teacher-facing education surfaces where source-governed
- professional education pathways
- structural literacy artifacts

System Location: Application / Human Systems / Somatic Observation Layer

Governance Relation: Source-governed, application-facing, authorization-gated

Human and Somatic Systems are not separate source architecture.

Human and Somatic Systems are not a separate theory.

Human and Somatic Systems are not a separate method.

Human and Somatic Systems are not therapy.

Human and Somatic Systems are not wellness coaching.

Human and Somatic Systems are a source-governed application domain.

IV. Domain Function

The function of the Human and Somatic Systems domain is to apply SSS / DHFT source architecture to bounded human-system, somatic, practitioner-facing, teacher-facing, and human-support contexts.

Human and somatic materials support structural literacy.

Human and somatic materials support understanding of Load, Capacity, Boundary, Structural Drift, Ambient Load, Load Displacement Through Ambiguity, somatic detection, human-system observation, decision conditions, and structural conditions that become detectable through human systems.

Human and somatic materials do not authorize implementation.

Human and somatic materials do not authorize therapy.

Human and somatic materials do not authorize treatment.

Human and somatic materials do not authorize diagnosis.

Human and somatic materials do not authorize practitioner training.

Human and somatic materials do not authorize teacher training.

Human and somatic materials do not authorize EMDR therapist training.

Human and somatic materials do not authorize certification.

Human and somatic materials do not authorize institutional use.

V. Source Boundary

Human and Somatic Systems do not define SSS.

Human and Somatic Systems do not define DHFT.

Human and Somatic Systems do not disclose SIM as an implementation manual.

Human and Somatic Systems do not modify Load–Capacity–Boundary Mechanics.

Human and Somatic Systems do not create body-specific mechanics.

Human and Somatic Systems do not create nervous-system-specific mechanics.

Human and Somatic Systems do not create trauma-specific mechanics.

Human and Somatic Systems do not create clinical mechanics.

Human and Somatic Systems apply source architecture to human-facing contexts without altering source hierarchy.

All human and somatic materials remain downstream from the source architecture.

VI. Observation Surface Scope

The Human and Somatic Systems domain includes human-system and somatic observation surfaces.

These surfaces include:

- body-based detection of Load
- somatic awareness of Boundary conditions
- human-system detection of Structural Drift
- embodied awareness of decision conditions
- nervous-system-facing structural literacy
- practitioner-facing observation materials
- teacher-facing observation materials
- human-support structural awareness materials
- non-clinical somatic education
- source-aligned human-system artifacts

These materials are bounded educational artifacts.

They do not constitute therapy.

They do not constitute somatic therapy.

They do not constitute trauma treatment.

They do not constitute clinical intervention.

They do not constitute diagnosis.

They do not constitute medical advice.

They do not constitute psychological intervention.

They do not constitute EMDR therapy.

They do not constitute authorized practitioner implementation.

VII. Non-Clinical Boundary

Human and Somatic Systems can interface with therapy, somatics, yoga, trauma-informed care, EMDR, coaching, wellness, and nervous-system education contexts.

Human and Somatic Systems are not reducible to therapy.

Human and Somatic Systems are not somatic therapy.

Human and Somatic Systems are not trauma treatment.

Human and Somatic Systems are not psychological intervention.

Human and Somatic Systems are not clinical practice.

Human and Somatic Systems are not wellness coaching.

Human and Somatic Systems are not nervous system coaching.

Human and Somatic Systems are not EMDR therapy.

Human and Somatic Systems are not yoga therapy.

Human and Somatic Systems are structural literacy applications grounded in SSS / DHFT / LCB.

Surface similarity to somatics, therapy, trauma work, wellness, coaching, yoga, EMDR, psychology, or nervous-system education does not establish equivalence.

VIII. Practitioner and Teacher Training Boundary

Practitioner-facing and teacher-facing materials associated with Human and Somatic Systems remain source-governed.

Drafted practitioner materials do not create public authorization.

Published teacher-facing materials do not create training authorization.

Vault materials do not create practitioner authorization.

Public DOI records do not create teaching authorization.

Human and somatic education materials do not create professional training authorization.

Practitioner training requires written authorization.

Teacher training requires written authorization.

EMDR therapist training requires written authorization.

Yoga teacher training requires written authorization where the materials are used as SSS / DHFT source-governed content.

Training adaptation requires written authorization.

Training translation requires written authorization unless separately authorized.

Professional or institutional adoption requires written authorization.

IX. Professional Implementation Boundary

Professional implementation is governed separately.

Professional implementation is not granted by public access to human and somatic materials.

Professional implementation is not granted by purchase of Vault materials.

Professional implementation is not granted by review of practitioner-facing, teacher-facing, or companion materials.

Professional implementation is not granted by attendance at an informational presentation unless expressly authorized in writing.

Authorized professional implementation requires SRI-governed pathway approval or written authorization from the source steward.

Certification, professional authorization, supervision, competency representation, institutional deployment, and human-systems implementation require written authorization.

X. Relationship to Somatic Rising Institute

Somatic Rising Institute (SRI) governs human and somatic authorization pathways.

SRI-governed pathways include:

- practitioner training
- teacher training
- EMDR therapist-facing training
- yoga teacher-facing education
- professional education
- human-systems curriculum licensing
- institutional implementation
- professional competency boundaries
- supervision
- authorized human-domain use
- licensed educational delivery

The Structural Stability Vault provides educational artifacts.

Somatic Rising Institute governs authorization.

Public materials support literacy.

SRI-governed pathways create authorization.

XI. Somatic Detection and Structural Observation Materials

Human and Somatic Systems include somatic-detection and structural-observation materials when source-governed.

Somatic detection materials are not clinical tools.

Structural observation materials are not diagnostic instruments.

Body-based language does not create therapy.

Nervous-system-facing language does not create psychological treatment.

Human-system materials do not determine diagnosis, pathology, compliance, trauma status, clinical condition, or treatment need.

Human and somatic materials do not authorize intervention, treatment, assessment, certification, supervision, or professional implementation.

Somatic detection, practitioner training, teacher training, institutional training, professional use, or human-systems deployment requires written authorization unless separately authorized.

XII. Non-Admissible Uses

Non-admissible uses of Human and Somatic Systems materials include:

- treating human-domain materials as source canon
- treating human-domain materials as SIM implementation manuals
- treating human-domain materials as therapy
- treating human-domain materials as somatic therapy
- treating human-domain materials as trauma treatment
- treating human-domain materials as clinical materials
- treating human-domain materials as diagnosis
- treating human-domain materials as psychological intervention
- treating human-domain materials as wellness coaching
- treating human-domain materials as nervous system coaching
- treating human-domain materials as EMDR therapy
- treating human-domain materials as yoga therapy
- treating Vault access as practitioner authorization
- treating public DOI access as teacher training
- treating human-domain materials as certification
- adapting materials into independent practitioner trainings without authorization
- translating materials without authorization
- training practitioners, teachers, clinicians, or therapists from materials without authorization
- representing competency without authorization

- using human-domain materials for assessment, certification, treatment, supervision, or institutional implementation without authorization

Such uses constitute boundary violations.

XIII. Authorized-Use Rule

All human-domain authorized use requires written permission.

Authorized use includes:

- practitioner training
- teacher training
- EMDR therapist-facing training
- yoga teacher-facing education
- professional education delivery
- institutional implementation
- human-systems curriculum licensing
- certification
- supervision
- professional competency representation
- human-domain deployment
- derivative training development
- translation
- adaptation
- licensed delivery
- commercial human-domain use

No public source record creates authorization.

No Vault purchase creates authorization.

No practitioner-facing material creates authorization.

No teacher-facing material creates authorization.

No educational artifact creates authorization.

XIV. Canonical Statement

Human and Somatic Systems are an application domain of Structural Stability Science, Dimensional Human Field Theory, the Structural Identification Method, and Load–Capacity–Boundary Mechanics.

Human and Somatic Systems support human-system, somatic, practitioner-facing, teacher-facing, and human-support structural literacy.

Human and Somatic Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, Load Displacement Through Ambiguity, or related source architecture.

Human and Somatic Systems are not equivalent to therapy, somatic therapy, trauma treatment, clinical practice, diagnosis, treatment, psychological intervention, wellness coaching, nervous-system coaching, EMDR therapy, yoga therapy, or medical advice.

Human and somatic materials support literacy.

Somatic Rising Institute governs training, certification, practitioner authorization, teacher training, curriculum licensing, institutional implementation, professional authorization, and authorized use.

All valid minimal structural descriptions reduce to Load (L), Capacity (C), and Boundary (B).

No additional variables are introduced at the minimal layer.

This document is part of the SSS / DHFT application-domain and human-somatic-boundary record series.

XVI. Copyright

This record is an original work of authorship.

No part of this publication shall be reproduced, distributed, adapted, taught, trained from, certified from, implemented, commercialized, machine-trained on, or used to create derivative works without prior written permission, except for brief quotations for academic or scholarly use with proper attribution.

This work defines and applies original structural terminology and boundary rules within Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), and Load–Capacity–Boundary Mechanics.

Public access to this record does not authorize assessment, audit, practitioner training, teacher training, EMDR therapist training, somatic therapy, therapy, diagnosis, treatment, certification, supervision, professional competency claims, institutional implementation, commercial deployment, machine use, or representation of authorized use.
