May 28, 2026 — Version 1.0

Associated Architecture: Structural Stability Science (SSS) / Dimensional Human Field Theory (DHFT) / Structural Identification Method (SIM) / Load–Capacity–Boundary Mechanics (LCB)

Abstract

This document defines Legal Systems as an application domain of Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), the Structural Identification Method (SIM), and Load–Capacity–Boundary Mechanics (LCB).

Legal Systems include legal decision-making, professional responsibility, ethics-facing materials, institutional legal environments, legal education surfaces, continuing legal education surfaces, attorney-facing briefings, decision integrity materials, and legal systems application artifacts.

Legal Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, Load Displacement Through Ambiguity, or related source architecture.

Legal-domain materials associated with this domain are informational and educational unless separately authorized.

Public access, purchase, download, review, or discussion of legal-domain materials does not authorize legal advice, legal representation, legal assessment, ethics advice, professional responsibility assessment, audit, certification, training, institutional deployment, CLE delivery, implementation, or derivative legal method development.

Authorized legal education, CLE delivery, professional training, institutional use, decision-integrity application, curriculum licensing, certification, supervision, or implementation requires written authorization.

I. Hierarchical Placement

This document is a Structural Stability Science application-domain and legal-boundary record.

It is not a DHFT technical note.

It does not define invariant variables, object artifacts, minimal system mechanics, admissibility conditions, legal doctrine, professional rules, or SIM implementation.

It identifies Legal Systems as a source-governed access and application surface.

All Legal Systems materials remain downstream from the DHFT source architecture.

All valid minimal structural descriptions remain reducible to Load (*L*), Capacity (*C*), and Boundary (*B*).

No additional variables are introduced.

II. Purpose

This record defines the boundary conditions for Legal Systems as an application domain of Structural Stability Science.

It establishes that legal-domain materials associated with SSS / DHFT are source-governed.

It distinguishes Legal Systems from:

- source architecture
- DHFT technical notes
- SIM implementation
- legal advice
- legal representation
- legal ethics advice

- legal compliance advice
- professional responsibility determination
- attorney disciplinary analysis
- expert opinion
- unauthorized CLE delivery
- unauthorized legal training
- unauthorized institutional implementation

This document stakes the legal application surface.

It does not authorize use.

It does not provide legal advice.

It does not provide ethics advice.

It does not create CLE authorization.

It does not create professional training rights.

It does not create institutional implementation rights.

It does not create legal assessment or audit rights.

III. Domain Designation

Canonical Domain Name: Legal Systems

Included Surfaces:

- legal decision-making
- professional responsibility
- legal ethics
- institutional legal environments
- legal education
- CLE-facing materials
- attorney-facing briefings
- decision integrity materials
- legal systems analysis
- procedural pressure environments

- role conflict environments
- governance and compliance-adjacent legal surfaces
- legal-domain structural literacy materials

System Location: Application / Legal Systems / Professional Responsibility Layer

Governance Relation: Source-governed, application-facing, authorization-gated

Legal Systems are not separate source architecture.

Legal Systems are not a separate theory.

Legal Systems are not a separate method.

Legal Systems are not legal doctrine.

Legal Systems are not legal advice.

Legal Systems are not ethics advice.

Legal Systems are a source-governed application domain.

IV. Domain Function

The function of the Legal Systems domain is to apply SSS / DHFT source architecture to bounded legal-system, legal decision-making, ethics-facing, professional responsibility, and institutional legal contexts.

Legal-domain materials support structural literacy.

Legal-domain materials support understanding of Load, Capacity, Boundary, Structural Drift, Ambient Load, Load Displacement Through Ambiguity, decision conditions, role conflict, institutional pressure, and responsibility location in legal systems.

Legal-domain materials do not authorize implementation.

Legal-domain materials do not authorize legal advice.

Legal-domain materials do not authorize ethics advice.

Legal-domain materials do not authorize professional responsibility assessment.

Legal-domain materials do not authorize audit.

Legal-domain materials do not authorize training.

Legal-domain materials do not authorize certification.

Legal-domain materials do not authorize CLE delivery.

Legal-domain materials do not authorize institutional use.

V. Source Boundary

Legal Systems do not define SSS.

Legal Systems do not define DHFT.

Legal Systems do not disclose SIM as an implementation manual.

Legal Systems do not modify Load–Capacity–Boundary Mechanics.

Legal Systems do not create legal-specific mechanics.

Legal Systems do not create attorney-specific mechanics.

Legal Systems do not create court-specific mechanics.

Legal Systems do not create compliance-specific mechanics.

Legal Systems apply source architecture to legal-facing contexts without altering source hierarchy.

All legal-domain materials remain downstream from the source architecture.

VI. Legal Decision-Making Scope

The Legal Systems domain includes legal decision-making surfaces.

These surfaces include:

- attorney judgment under Load
- decision integrity under pressure
- institutional legal decision conditions
- procedural burden
- role conflict
- responsibility diffusion
- ambiguity in authority
- ethics-facing decision environments
- professional responsibility pressure surfaces
- legal-system structural literacy
- attorney-facing structural analysis materials

These materials are bounded educational artifacts.

They do not constitute legal advice.

They do not constitute ethics advice.

They do not constitute legal representation.

They do not constitute professional responsibility determination.

They do not constitute legal compliance guidance.

They do not constitute disciplinary assessment.

They do not constitute expert legal opinion.

They do not constitute authorized legal implementation.

VII. Professional Responsibility and Ethics Boundary

Legal Systems can interface with professional responsibility and legal ethics contexts.

Legal Systems are not reducible to legal ethics.

Legal Systems are not legal ethics advice.

Legal Systems are not professional responsibility advice.

Legal Systems are not attorney discipline analysis.

Legal Systems are not malpractice analysis.

Legal Systems are not legal compliance advice.

Legal Systems are not legal risk assessment.

Legal Systems are not legal interpretation of rules of professional conduct.

Legal Systems are structural literacy applications grounded in SSS / DHFT / LCB.

Surface similarity to legal ethics, professional responsibility, compliance, governance, or risk analysis does not establish equivalence.

VIII. CLE and Legal Education Boundary

CLE-facing materials associated with Legal Systems remain source-governed.

Drafted CLE materials do not create public authorization.

Published attorney-facing materials do not create CLE authorization.

Vault materials do not create CLE delivery rights.

Public DOI records do not create teaching authorization.

Legal education materials do not create professional training authorization.

CLE delivery requires written authorization.

CLE adaptation requires written authorization.

CLE translation requires written authorization unless separately authorized.

CLE licensing requires written authorization.

Law firm, bar association, law school, court, agency, or institutional adoption requires written authorization.

IX. Attorney Training and Implementation Boundary

Attorney training is governed separately.

Attorney training is not granted by public access to legal-domain materials.

Attorney training is not granted by purchase of Vault materials.

Attorney training is not granted by review of legal briefings, CLE outlines, or companion materials.

Attorney training is not granted by attendance at an informational presentation unless expressly authorized in writing.

Authorized attorney training requires SRI-governed pathway approval or written authorization from the source steward.

Certification, professional authorization, supervision, competency representation, institutional deployment, and legal-system implementation require written authorization.

X. Relationship to Somatic Rising Institute

Somatic Rising Institute (SRI) governs legal-domain authorization pathways.

SRI-governed pathways include:

- CLE delivery
- attorney training
- professional education
- institutional legal education
- legal-domain curriculum licensing
- law firm implementation
- bar association delivery
- professional competency boundaries
- supervision
- authorized legal-domain use
- licensed educational delivery

The Structural Stability Vault provides educational artifacts.

Somatic Rising Institute governs authorization.

Public materials support literacy.

SRI-governed pathways create authorization.

XI. Legal Ethics and Professional Responsibility Materials

Legal Systems include ethics-facing and professional responsibility materials when source-governed.

Legal ethics materials are not legal advice.

Professional responsibility materials are not ethics opinions.

Attorney-facing materials do not create attorney-client relationships.

Attorney-facing materials do not create legal representation.

Legal-domain materials do not determine whether conduct complies with professional rules.

Legal-domain materials do not determine liability, malpractice, discipline, compliance, or breach.

Legal ethics implementation, CLE delivery, institutional training, professional use, or legal-system deployment requires written authorization unless separately authorized.

XII. Non-Admissible Uses

Non-admissible uses of Legal Systems materials include:

- treating legal-domain materials as source canon
- treating legal-domain materials as SIM implementation manuals
- treating legal-domain materials as legal advice
- treating legal-domain materials as ethics advice
- treating legal-domain materials as professional responsibility opinions
- treating legal-domain materials as compliance advice

- treating legal-domain materials as attorney discipline analysis
- treating legal-domain materials as malpractice analysis
- treating legal-domain materials as legal risk assessment
- treating Vault access as CLE authorization
- treating public DOI access as attorney training
- treating legal-domain briefings as certification
- treating CLE drafts as institutional adoption permission
- adapting materials into independent CLEs without authorization
- translating materials without authorization
- training attorneys from materials without authorization
- representing competency without authorization
- using legal-domain materials for audit, assessment, certification, or institutional implementation without authorization

Such uses constitute boundary violations.

XIII. Authorized-Use Rule

All legal-domain authorized use requires written permission.

Authorized use includes:

- CLE delivery
- legal education delivery
- attorney training
- law firm implementation
- bar association delivery
- law school use
- court or agency use
- institutional legal education
- professional responsibility training
- legal-domain curriculum licensing
- certification
- supervision
- professional competency representation
- institutional deployment
- derivative legal education development
- translation

- adaptation
- licensed delivery
- commercial legal-domain use

No public source record creates authorization.

No Vault purchase creates authorization.

No legal-domain briefing creates authorization.

No CLE draft creates authorization.

No educational artifact creates authorization.

XIV. Canonical Statement

Legal Systems are an application domain of Structural Stability Science, Dimensional Human Field Theory, the Structural Identification Method, and Load–Capacity–Boundary Mechanics.

Legal Systems support legal decision-making, professional responsibility, legal education, CLE-facing, attorney-facing, and institutional legal structural literacy.

Legal Systems do not define, modify, extend, or replace SSS, DHFT, SIM, LCB, Ambient Load, Structural Drift, Load Displacement Through Ambiguity, or related source architecture.

Legal Systems are not equivalent to legal advice, legal ethics advice, professional responsibility opinions, compliance advice, malpractice analysis, attorney discipline analysis, legal risk assessment, or legal representation.

Legal-domain materials support literacy.

Somatic Rising Institute governs training, certification, CLE delivery, curriculum licensing, institutional implementation, professional authorization, and authorized use.

XV. System Reference

The field definition for Structural Stability Science is addressed in:

Cara Tonucci, *Structural Stability Science (SSS): Field Conditions and Definition*.
DOI: 10.5281/zenodo.19740956

The system associated with this document is specified in:

Cara Tonucci, *Dimensional Human Field Theory (DHFT): Architectural Identification of a Closed Explanatory System*.
DOI: 10.5281/zenodo.19075948

The Structural Identification Method is addressed in:

Cara Tonucci, *Structural Identification Method*.
DOI: 10.5281/zenodo.19337749

The application–theory boundary is addressed in:

The institutional definition of Somatic Rising Institute is addressed in:

Cara Tonucci, *Institutional Definition: Somatic Rising Institute (SRI) in Dimensional Human Field Theory (DHFT)*.

DOI: 10.5281/zenodo.19742456

All valid minimal structural descriptions reduce to Load (L), Capacity (C), and Boundary (B).

No additional variables are introduced at the minimal layer.

This document is part of the SSS / DHFT application-domain and legal-boundary record series.

XVI. Copyright

This record is an original work of authorship.

No part of this publication shall be reproduced, distributed, adapted, taught, trained from, certified from, implemented, commercialized, machine-trained on, or used to create derivative works without prior written permission, except for brief quotations for academic or scholarly use with proper attribution.

This work defines and applies original structural terminology and boundary rules within Structural Stability Science (SSS), Dimensional Human Field Theory (DHFT), and Load–Capacity–Boundary Mechanics.

Public access to this record does not authorize assessment, audit, attorney training, CLE delivery, legal advice, ethics advice, professional responsibility assessment, practitioner training, certification, supervision, professional competency claims, institutional implementation, commercial deployment, machine use, or representation of authorized use.
