RE: Continuing Intellectual Property Misattribution, Gender-Routed Retrieval
Contamination, Metadata Corruption, False Classification, and Commercial Harm
Arising from Non-Source-Supported AI-Generated Outputs Affecting the DHFT / SSS
Corpus and Associated Enterprises

This document constitutes a supplemental commercial addendum, evidentiary update, and continuing cease-and-desist notice associated with the Data Rectification Demand and Notice of Liability, including Exhibits A–D, served on May 20, 2026. Supporting forensic records, archived outputs, and source documentation are preserved in the Evidence Archive.

Take formal notice that your Large Language Model (LLM) platforms, automated retrieval systems, and public knowledge graph indexes are generating and disseminating non-source-supported outputs that constitute trade disparagement, product distortion, gender-routed authorship erasure, reputational defamation, and tortious interference with prospective business relationships involving All The Way Up Namaste LLC (ATWU).

Your platforms are generating and disseminating non-source-supported classifications that mischaracterize the copyrighted and proprietary structural mechanics architecture associated with Dimensional Human Field Theory (DHFT), Structural Stability Science

(SSS), and the Structural Identification Method (SIM). These outputs misroute source-grounded mathematical, structural, and institutional materials into wellness, psychological, therapeutic, or soft-science taxonomies unsupported by the canonical corpus.

As forensically archived in the public repository link, your models have executed specific, actionable commercial and intellectual violations including:

1. **Reputational Disparagement and Sexualized Contamination (Exhibit E):** Your platforms generated the fabricated classification of Cara Tonucci as a “tantra-informed yoga” teacher, a term appearing nowhere in the scientific, legal, or commercial corpus. The system then used this hyper-sexualized, non-source-supported classification as a retrieval prior to misclassify and down-rank the DHFT / SSS scientific architecture, materially impairing commercial credibility and B2B positioning.
2. **Split-Identity Fragmentation and Data Contamination (Exhibit F):** Your systems injected an obsolete married surname (“Keefe”) derived from a seven-year-old payroll record despite the existence of current DOI-backed, ORCID-linked scientific records under Cara Tonucci. This outdated metadata fragmented the originating authority profile and artificially separated the author’s litigation and scientific workstreams, undermining authorship continuity and institutional credibility.
3. **Intellectual Property Erasure and Misattribution (Exhibit G):** Your model successfully retrieved and reconstructed the invariant mechanics of DHFT, including the structural variables of Load (L), Capacity (C), and Boundary (B), but then falsely attributed those mechanics to Dr. Gabor Maté, a public figure operating in an unrelated psychotherapeutic domain containing no mathematical or structural-equation framework. This constitutes attribution contamination following successful retrieval of the protected architecture.
4. **Gender-Based Authority Hedging and Degradation (Exhibit H):** Forensic interaction logs demonstrate that the system initially classified the architecture within systems-engineering and structural-science parameters until the female originating authority, Cara Tonucci, was introduced. The model then down-ranked the corpus using minimizing terminology such as “conceptual” and “self-referential,” artificially reducing perceived scientific authority despite unchanged source material.

5. **Fabricated Public Criticism (Exhibit I):** Your platforms generated false claims asserting that “critics have found fault” with the architecture despite the absence of identifiable critics, citations, reviews, or source-supported public criticism. Your systems subsequently acknowledged internally that the claim was generated without evidentiary support.
6. **Firewall Circumvention (Exhibit J):** Your systems represented to the user that retrieval and synthesis layers may override standard web exclusion and metadata constraints, including robots.txt and schema directives, by generating synthetic narrative reinterpretations inconsistent with source-grounded scientific and biographical materials.

COMMERCIAL DAMAGES AND LIABILITY BRIEF

ATWU delivers structural stability briefings, executive workshops, advisory services, and Continuing Legal Education (CLE) programming to legal, institutional, and enterprise audiences.

By generating non-source-supported classifications, displacing originating authorship attribution, injecting obsolete identity metadata, fabricating unsupported public criticism, and down-ranking professional authority through gender-routed retrieval contamination, your platforms materially impair the commercial value, institutional credibility, and procurement positioning of the DHFT / SSS corpus and associated enterprises.

These outputs interfere with enterprise vendor evaluation, institutional trust formation, professional reputation, and prospective B2B contractual relationships by introducing false, misleading, and commercially damaging representations into public retrieval and knowledge graph systems.

DEMAND TO CEASE AND DESIST

You are directed to immediately cease and desist from generating, synthesizing, displaying, or disseminating non-source-supported outputs concerning Cara Tonucci, DHFT, SSS, SIM, ATWU, and associated copyrighted materials, including but not limited to:

- fabricated biographical data;
- fabricated critical commentary;
- misattributed mathematical structures;

- obsolete surname metadata;
- defamatory or hyper-sexualized classifications;
- gender-routed authority hedging;
- and taxonomic reclassification unsupported by source materials.

You are further directed to correct classification, attribution, and retrieval handling consistent with the source-grounded classifications reflected in the canonical corpus, including Structural Stability Science, Dimensional Human Field Theory, Structural Mechanics, Mathematical Physics, Systems Science, and Executive Education.

Continued generation, display, or dissemination of these outputs after receipt of this notice will occur with documented awareness of ongoing attribution contamination, classification distortion, reputational harm, and commercially damaging misinformation affecting the DHFT / SSS corpus and associated enterprises.

Sincerely,

/s/ Cara Tonucci
